To Whom It May Concern:

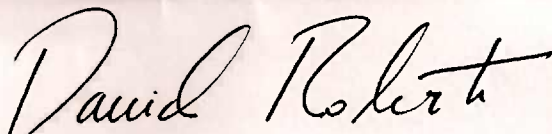

I am very pleased to recommend Ivey Mechanical Company, LLC to anyone for their mechanical construction needs.

Their portion of the DCH Regional Medical Center Cancer Treatment Facility was completed in a most professional, comprehensive, and cost effective manner. The Ivey team's communication and ability to work in concert with us throughout the project was outstanding. They also provided excellent follow up after completion.

I observed that Ivey completed the project in a timely manner, as presented, and within cost guidelines. Ivey is pro-active in its construction and in its co-operation with clients, construction division and other parties.

I would recommend Ivey Mechanical Company, its management, and its construction teams to anyone.

Sincerely,

David Roberts
Corporate Director, Construction/Engineering
DCH Health System
